JETRO Nairobi: Here to connect you

Economic ties between Kenya and Japan predate Kenya’s independence and continue to get stronger. Kenya has increasingly developed as a regional economic hub and its partnership with Japan continues to grow as Japanese investments in the country expand. Since its establishment, the Japan External Trade Organisation (JETRO) has strived to promote mutually beneficial trade between Japan and Kenya. These efforts have led to a significant number of investments from Japan to Kenya, such that in the last two decades, the number of Japanese investors has risen to more than 80 companies (see graph).

In a survey carried out by JETRO on 327 Japanese-affiliated companies in Africa, Kenya was rated the top country to invest in for the future, with a percentage of 35.1 percent for the sixth year in a row. The above statistics illustrate Kenya’s vibrant economy in East Africa, and there has been significant interest coming from Japan for more investment into Kenya. JETRO Nairobi has supported several fundraising cases for Kenyan start-ups from Japanese investors. If you are a Kenyan start-up entrepreneur who would like to raise capital from Japanese companies, I recommend that you contact JETRO first.

In addition, JETRO is currently running an online matching programme between Kenyan distributors and Japanese Manufacturers in the fields of Medical Equipment, Agricultural Equipment, General Machinery, and FMCG. You are most welcome to approach us if you are interested in importing and distributing those Japanese machineries/products.

JETRO, as the Japanese Governmental Agency aimed at promoting trade and investment between Japan and the rest of the world, is providing the above services and programmes at no cost.

For further information about our programmes, kindly contact us.

Greetings from the Chairman of the Japan Business Association in Kenya

The Japan Business Association in Kenya is a network meant to enhance the Japanese business community in Kenya, a country that has become the main economic hub in East Africa.

The Japan Business Association in Kenya, established in the 1980s, represents 59 members from various industries (construction, IT, manufacturing, retail, tourism, transport, etc), and remains open to any Japanese individuals, companies or institutions setting up operations in Kenya.

The association supports members’ commercial and industrial activities to expand trading and increase investments in Kenya by sharing valuable insights and best practices.

The Japan Business Association in Kenya aims at contributing to the strengthening of economic and friendly relations between Japan and Kenya.

Thanks to our discussion with Kenyan authorities in the Business Dialogue, the issuance procedure of work permits has been improved and our members have been able to get their documents faster than ever. This practice will add up to increase in the Japanese investments in Kenya.

From Kenyans perspective, the Japan Business Association in Kenya offers the opportunity to access and reach a large Japanese business audience through us, as a single window.

The Japan Business Association in Kenya believes to be a key player in the development of further business partnerships between Japan and Kenya.

Katsutoshi NISHI
Chairman, Japan Business Association

From Kenyans perspective, the Japan Business Association in Kenya offers the opportunity to access and reach a large Japanese business audience through us, as a single window.
